Art Unit: 2811

1. Claims 7, 9 and 10 are objected to because of the following informalities: Claim 7, line 1, the phrase "the area" has no antecedent basis. Claim 9, lines 1-2, the phrase "the plurality of through holes" has no antecedent basis. Appropriate correction is required.

2. Claims 1-13 and 21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Fig. 3A discloses a lead finger [371] is electrically connected to the conductive sheet [340]. The specification never discloses a plurality of lead fingers electrically connected to the conductive sheet as claimed in claims 1, 13 and 21.

3. Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 21, line 8, the word "they" is unclear as to what elements is it being referred to.

4. Applicant's arguments with respect to claims 1-13 and 21 have been considered but are moot in view of the new ground(s) of rejection.
